Vol. 01

INA is dedicated to staying one step ahead by continuously improving product quality while ensuring affordability. Our mission is to provide comprehensive bathroom solutions for everyone, enhancing everyday life.

Welcome to INA, where excellence meets everyday comfort.

Our Story

One of The Pioneers in The Sanitary Ware Industry

PT. INAX International, founded in 1978 in Semarang, has been a pioneer in the production of sanitary ware for the Indonesian market. Starting with squatting toilets, the INA brand quickly gained popularity for its durability and wide range of color options. The strategic location of our factory—near both an international airport and seaport—enables us to ship products quickly and efficiently to various cities and countries.

State-of-the-art Manufacturing

Our industrial estate spans over 70 hectares, equipped with the latest technology in sanitary ware production. Every process is designed to meet the highest standards of safety, quality, and environmental sustainability.

Highest Standards of Quality

Before each product is packed, final quality inspections are carried out at every stage of the production process. Only products that meet the highest standards of quality are delivered to our valued customers.

World-class Team

INA is guided by a management team made up of international experts with over 40 years of collective experience in the ceramic sanitary ware industry. Our team brings diverse backgrounds and a proven track record of success in leading and growing businesses across the globe.

Designed with Passion

Our products are designed with the latest trends and innovations in mind — to create items that are highly functional, easy to clean, and most importantly, visually appealing.

Finest Materials

Great products begin with exceptional materials. Our ceramic is crafted using premium raw materials, carefully sourced from trusted and responsible partners. Through meticulous selection and rigorous testing, we ensure that every component meets our uncompromising standards for quality, durability, and performance.

Excellence in Sustainability

At PT INAX International, sustainability is more than a vision — it's a way of doing Business. Our commitment to The Global Goals is reflected in our achievement of the Green Industry Certification, a testament that we walk the talk when it comes to protecting the environment.

We are dedicated to preserving the planet's resources through the adoption of automated systems, water-saving technologies, and advanced waste treatment solutions — ensuring our operations remain both highly efficient and environmentally friendly.

Proudly Made in Indonesia

INA has a proven track record of winning consumers' hearts. We take pride in producing high-quality products made in Indonesia by our talented people. Our commitment goes beyond manufacturing — we actively engage with local communities, provide extensive training, and give back through various initiatives. Each product we create reflects not only our dedication to excellence, but also our passion for community development.

Sandstone Squatting Toilets

Introducing the New INA Sandstone Series — Inspired by Nature, Designed to Enrich Your Bathroom

Savanna Sandstone inspired by the golden hues and vast serenity of the savanna landscape. It brings the calming essence of nature into your space, evoking peace and harmony through its natural, golden tones.

Drawn from the strength of the earth, **Andesite Sandstone** reflects the raw beauty of volcanic mountain ranges. Inspired by the volcanic landscapes of the Andes Mountains, it embodies resilience and natural elegance, adding depth and character to any room.

Make a bold statement with **Glacial Black Sandstone**, inspired by the timeless elegance of glacial landscapes sculpted by nature's force. It radiates enduring grace, formed by natural elements over time—bringing dramatic sophistication to your space.
